

HW9

David Scaperoth

2023-07-10

From previous Section...

```
# Inner join based on the "cand_id" column
result <- inner_join(results_house, campaigns, by = "cand_id")
```

Q3.4 Exploring - Indicator Variables and Scatter Plot

```
# OTHER category created from all ambiguous labels
result$candidate_party <- result$party
mask <- !(result$candidate_party=='REP' | result$candidate_party=='DEM')
result$candidate_party[mask] <- "OTHER"
```

Scatter Plot of
Campaign Contributions vs. Votes in the House
